

Premium Vegetable Container Wax

Golden Wax has three blended waxes that contain soy-based additives and are FDA-approved and Kosher-certified. The additives enable the soy to be poured at hotter temperatures reducing frosting and increasing FO load. They blend well with paraffin, slack wax, and microcrystalline waxes.

AAK 464: Has a lower melt point which gives better glass adhesion producing fewer wet spots.

Pour Temp: 125°-145° | Melt Point: 115°-120° | FO Load: 7%-9%

AAK 444: Has a higher melt point which enables it to retain a higher FO load to give you a stronger scent throw.

Pour Temp: 125°-145° | Melt Point: 120°-125° | FO Load: 9%-11%

AAK 494: Is formulated specifically for soy tart and melts without the need for additives or paraffin. It is made from 100% botanical materials. It eliminates frost and bloom and easily releases from molds, with a great scent throw.

Pour Temp: Heat to 170F, pour above 150F | Melt Point: 120-125F | FO Load: 5%-10%

Pure Soy Container Wax

Golden Wax's GW415 contains no additives and is FDA approved and Kosher-certified. It blends well with beeswax, paraffin, slack wax, and microcrystalline waxes.

AAK 415: Has a high melt point which enables it to retain a high FO load to give you a strong scent throw.

Pour Temp: 90°-100° | Melt Point: 120°-125° | FO Load: 8%-10%

Soy & Coconut Container Wax

Golden Wax 454: This is a preblended Soy and Coconut plant-based wax. It offers good adhesion and a reduction in frosting without adding any additional softeners. Less than 50% coconut wax.

Pour Temp: : 155°F-165°F | Melt Point: 115°F-125°F | Fragrance Load: 5-10%
