

Wick Guide

ECO WICKS

ECO Wicks are constructed as a flat, coreless wick. These wicks improve burn stability and wick curling. ECO wicks are cotton and are interwoven with specially treated paper filaments, to increase wick rigidity. The wicks have self-trimming capabilities which decrease mushrooming and soot.

	Pool Diameter (IN)	Flame Height (IN)	Rate of Consumption (oz/hr)
ECO 2	2.40"	1.60"	0.18
ECO 4	2.50"	1.70"	0.20
ECO 6	2.60"	1.80"	0.24
ECO 8	2.80"	2.10"	0.26
ECO 10	2.80"	2.20"	0.27
ECO 12	2.90"	2.20"	0.28
ECO 14	3.10"	2.20"	0.33
ECO 16	3.30"	2.30"	0.36

*The data provided in this document are meant to serve only as a guide for our customers to assist them in wick selection. Many variables exist in candle wax types, additives and formulations for individual candle systems. Final wick selection should always be confirmed through the customer's own testing process to determine if a particular wick is the best choice for a particular candle system. Fillmore Container is not responsible for selections made by the customer using any of the reference material contained in this document. For optimal burn performance in specific candle systems, we strongly recommend that customers conduct extensive burn test in their own burn lab. **The importance of candle testing cannot be overstated.***
