

New Style for RC-058 WHITE Plastisol Lids

Fillmore Container has been a top distributor of Tecnocap closures for many years. We recently have been notified of a new top style that will be used on the 58/400 Plastisol Lined Continuous Thread closures. This change provides a more consistent plastisol application resulting in a uniform plastisol ring and uniform sealing, providing a higher quality product. **We have received this new style on the [RC-058 White](#) Lids only and they will be available for purchase shortly.**

At this time only the [RC-058 White lid](#) is affected by this change.
