

IFRA 50 CERTIFICATE

Phoenix certifies to the best of our knowledge that the following product is in compliance with the Standards of the International Fragrance Association (IFRA – 50th Amendment / published August 30, 2021), provided it is used in the following classes at a maximum concentration of:

VANILLA WOODS TS153

IFRA Category	Limit (%)	IFRA Category	Limit (%)
Category 1	Not permitted	Category 7A	1.39
Category 2	2.32	Category 7B	1.39
Category 3	1.39	Category 8	0.23
Category 4	16.28	Category 9	6.44
Category 5A	11.03	Category 10A	6.44
Category 5B	0.71	Category 10B	21.21
Category 5C	2.81	Category 11A	0.23
Category 5D	0.23	Category 11B	0.23
Category 6	Not permitted	Category 12	No restriction

The IFRA Standards regarding use restrictions are based on safety assessments by the Panel of Experts of the Research Institute for Fragrance Materials (RIFM) and are enforced by the IFRA Scientific Committee. All components of this mixture have been reviewed by RIFM for safety and are found on the IFRA Transparency List.

An IFRA Standard may prohibit the use of a material when it is intended to be used as such in a fragrance mixture. However, this does not necessarily exclude the use of a natural fragrance material (Natural Complex substance, NCS), which contains the prohibited material as a constituent or impurity, or the use of a synthetic, chemically defined material, which contains the prohibited material as an impurity (i.e., added indirectly), provided that in the judgment of the Expert Panel for Fragrance Safety, there is sufficient data supporting the safe use of the fragrance material and that it is not being used to provide an alternative, indirect source of the prohibited material.*

It is the ultimate responsibility of the customer to ensure the safety of the final product (containing this raw material) by further testing if need be.
